DETAILED ACTION

Rule 105 Request

1. The scope of 37 CFR 1.105 is extended to any assignee because the information required may be known to some members of the assignee even if not known by the inventors.

The authority for the Office to make such requirements arises from the statutory requirements of examination pursuant to 35 U.S.C. 131 and 132. An examiner or other Office employee may make a requirement for information reasonably necessary to the examination or treatment of a matter in accordance with the policies and practices set forth by the Director(s) of the Technology Center or other administrative unit to which that examiner or other Office employee reports.

Examiner is requesting any written descriptions or brochures, catalogues, or suppliers' trade names or designations, known by any of the inventors or assignees, of intermediate goods used in the manufacture of the claimed subject matter. Specifically, if the metal of page 3 line 25 - page 4 line 10, or the metal of claim 13, is being provided by an outside supplier "as-is", examiner requests any ASTM designations for the metal being claimed, any manufacturers and/or the manufacturer's trade name or designation of the metal, and any designations by which the metal having the composition of page 3 line 25 - page 4 line 10 or claim 13 is known:
